CSS (Part 1)
Practice Solutions

Ans 1

Simply add the background color in the body tag.

```html
<body style="background-color: wheat">
```

Ans 2 to Ans10

Create a separate CSS file and link it with your html code.

In the CSS file write the following code :

```css
p {
    color: brown;
    text-align: center;
    line-height: 30px;
}

h1 {
    text-align: center;
    color: red;
    font-family: Georgia;
}

h3 {
    text-align: center;
    color: black;
```

```css
}

a {
   text-decoration: none;
   color: green;
}

button {
   background-color: white;
   color: blueviolet;
}

textarea {
   color: black;
}

span {
   text-decoration: underline;
}
```

In Qs 10, put the word 'Ozymandias' inside a span element. And then set the property text-decoration for the span element.

As shown in the line:

```html
My name is <span>Ozymandias</span>, King of Kings;<br />
```
